Metso

Summary

Q1 2007 figures will be published on 27th April. The analysts expect the sales to increase by 25.1% to € 1.35bn. The EBIT-Margin is estimated to come out at 8.6% after 8.8% in Q1 2006. The estimates do not include any one off items.

Outlook given by the company: Thanks to the strong order backlog, continuing favourable market situation and the expanded business scope, Metso's net sales in 2007 are estimated to grow by more than 20 percent on 2006, and the operating profit is estimated to clearly improve. At present, it is estimated that the operating profit margin in 2007 will be slightly below Metso's over 10 percent target. Due to the timing and mix of deliveries and normal seasonal variation the first quarter is expected to be the weakest in 2007. Net sales and operating profit for the last three quarters of the year will clearly improve from the first quarter.
